

MOHIT

Full-Stack Developer

Chandigarh, India • +91 7850980009 • mohitgujjar2121@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with approximately 3 years of professional experience building production-grade mobile, web, and backend applications. Proficient in delivering scalable solutions using React Native, React.js, Next.js, Node.js, and Express.js. Experienced in developing multi-tenant SaaS platforms, microservices architectures, and REST APIs, alongside implementing Server-Side Rendering (SSR), technical SEO, and mobile deployment pipelines. Adept at cross-functional collaboration, third-party integrations, and resolving complex production issues to deliver robust applications.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python

Frontend / Web: React.js, Next.js, Server-Side Rendering (SSR), Dynamic SEO, Metadata, JSON-LD, Structured Data, MUI, MUI DataGrid, Recharts, Framer Motion

Mobile Development: React Native, React Native Reanimated, Android Flavors, iOS Schemes, OTA Updates

Backend: Node.js, Express.js, NestJS, REST APIs, Microservices Architecture

State Management & Forms: Redux Toolkit, RTK Query, Zustand, TanStack Query, React Hook Form, Zod

Databases: MongoDB, PostgreSQL, MySQL

Architecture & Tools: Turborepo, Monorepo Architecture, Multi-Tenant SaaS, Microservices, Git, PM2, pgAdmin 4

Cloud & Integrations: AWS, Firebase, Stripe, Google Maps APIs, Google OAuth, LinkedIn OAuth, Google reCAPTCHA, Google Analytics, Facebook Pixel, LinkedIn Insight Tag

WORK EXPERIENCE

Apptunix — Full-Stack Developer | Jan 2024 – Present

- Developed production-grade React Native mobile applications and responsive web applications utilizing React.js and Next.js.
- Engineered and integrated robust REST APIs using Node.js and Express.js, seamlessly working across frontend and backend codebases based on project requirements.
- Contributed to the development of SaaS and multi-tenant application architectures, as well as microservices-based Node.js backends within Turborepo and monorepo environments.
- Configured mobile deployment workflows, implementing Android Flavors, iOS Schemes, and Over-The-Air (OTA) updates for React Native applications.
- Implemented Server-Side Rendering (SSR), technical SEO, metadata, and JSON-LD structured data in Next.js applications to enhance discoverability.
- Integrated diverse third-party services, including authentication providers (Google, LinkedIn), payment gateways (Stripe), mapping services, and tracking platforms.
- Maintained existing production applications utilizing PostgreSQL and MongoDB, utilizing pgAdmin 4 to debug and resolve complex production issues.
- Collaborated directly with UI/UX designers, QA engineers, and cross-functional teams; participated in technical architecture discussions and mentored junior developers.
- Communicated requirements and technical implementations effectively with clients.

OPEN SOURCE PROJECTS

rn-snappy-toast — Creator & Maintainer | React Native • npm Package

[GitHub Repository](#) • [npm Package](#)

- Developed and published a lightweight, customizable, zero-dependency toast notification library for React Native.
- Implemented dynamic queue handling, swipe-to-dismiss gestures, custom positioning, and smooth animations optimized for modern React Native architecture.
- Maintained TypeScript typings, comprehensive documentation, and npm package releases for developer usability.

PROJECTS

MindBase Apps (Student & Tutor) — Live | React Native • SaaS

Student: [Google Play](#) | [App Store](#) • Tutor: [Google Play](#) | [App Store](#)

- Developed a multi-tenant SaaS scheduling platform comprising separate Student and Tutor applications to schedule sessions between students and teachers.
- Implemented parent onboarding within the student app, enabling parents to manage children accounts within defined account limits.
- Configured advanced mobile build workflows using Android Flavors and iOS Schemes to generate separate tenant-specific binaries from a single codebase.
- Resolved lack of browser origins in mobile runtimes by defining custom origin handling managed via environment configurations for dynamic tenant data synchronization.

Women First Jobs — Live | React Native • Next.js • React.js • Dynamic SEO

Google Play • App Store • Live Website

- Delivered a comprehensive job platform featuring an employee-focused mobile app, dual employer/employee website workflows, and an administrative panel.
- Implemented dynamic Server-Side Rendering (SSR) across public job listings and dynamic Open Graph metadata on detail pages for rich sharing previews.
- Managed URL-based SEO controls through the admin dashboard and implemented JSON-LD structured schemas for enhanced search indexing.
- Integrated Google Analytics, Facebook Pixel, LinkedIn Insight Tag, Google reCAPTCHA, Google OAuth (including floated login handling), and LinkedIn login workflows.

NutraCoin — Live | React Native • Digital Asset

Google Play • App Store

- Developed a digital asset mobile application providing a non-custodial wallet experience tailored for a specific user group.

Sanad Roadside Assistance (Sanad Link & Sanad Link Ops) — In Progress | React Native • Location Tracking • Stripe

- Developed customer and driver operations React Native applications enabling users to request real-time roadside assistance with in-app payments.
- Integrated live location tracking, native splash screen handling, and an Over-The-Air (OTA) update workflow using GitHub with silent push notifications and modal confirmations.

Bouteek — In Progress | Node.js • Express.js • Turborepo • PostgreSQL • Microservices

- Contributed exclusively to the backend development of an ongoing multi-service platform encompassing an admin panel, vendor panel, user app, and website.
- Developed and debugged REST APIs within an established Turborepo-based monorepo architecture utilizing multiple microservices running under separate PM2 processes.
- Maintained PostgreSQL-backed services, utilizing pgAdmin 4 to inspect database structures, investigate issues, and resolve backend bugs.

Yotman — In Progress | React.js • Python • Django

- Worked on the specialist website for this project and provided support for the Python backend, including development, maintenance, and issue resolution.

Anemomylos Travel — Deployment Stage | Next.js • React.js • SSR

- Developed a tour guide booking platform with a React-based admin panel and a public Next.js website.
- Implemented dynamic date-range pricing along with fixed-date pricing options, Server-Side Rendering (SSR) for public listings, Open Graph metadata, and JSON-LD schemas.

GoGreek Website — In Progress | Next.js • SSR • Framer Motion

- Built an interactive yogurt ordering website featuring a custom yogurt creation flow where users select custom flavors and toppings.
- Utilized Framer Motion to visualize live customization updates on the interactive cup UI while maintaining full Server-Side Rendering across public listings.

Whizzo AI — Completed (Client Deployment on Hold) | React.js • AI Workflows • Fabric.js

- Developed a React.js web application and admin panel with AI features for generating presentations from prompts and editing content prior to download.
- Implemented document tools for removing pages from PDFs and converting file formats, alongside a canvas-based note-taking section using Fabric.js for text and image placement.

Gina Ex — Live | React.js • MUI DataGrid

- Developed an administrative panel for Gina Ex, a platform enabling traveling users to transport parcels for other users for a fee.
- Implemented Material UI and MUI DataGrid for high-performance handling, sorting, and filtering of structured platform tables.

Life Fit — Live | React.js • API Integration

- Built an administrative dashboard for Life Fit, a platform providing users with fitness resources such as calorie counters and diet plans.
- Engineered reusable UI components and integrated administrative REST APIs to manage nutrition programs and user tracking features.

EDUCATION

Master of Computer Applications (MCA) — Panjab University, Sector 14, Chandigarh (80%)	2022 - 2024
Bachelor of Computer Applications (BCA) — DAV College, Sector 10, Chandigarh (80%)	2019 - 2021
